Our Bangladesh is a thickly populated country. To meet our rapid industrialization, we are importing Raw Materials, Crude Oils etc. We are exporting Finished goods. The waste materials will stay with us. We need safe and controlled discharge of these waste materials. We need to develop our national policy toward: Zero Energy Demand, Zero Discharge and Zero Pollution. Then we shall be able to keep a safe and sustainable Bangladesh to our next generation.

I believe that the Show will make a good start to create the B2B interaction that will help our industry to grow more and to compete globally. The exhibition will provide a platform for exchanging ideas on the latest developments in technologies.
